

假定你是李华。你的外国笔友 Mark 在邮件中说, 学校摄影比赛中有幅作品因使用 AI 技术生成而被取消参评资格。请你回复邮件谈谈你对这一事件的看法及理由。

1. 精准审题 核心任务: 对 AI 生成摄影作品被取消资格→亮明观点 + 阐述理由

2. 从题目里找得分点

关键信息: AI 生成、摄影比赛、取消资格

必写理由: ① 摄影比赛核心是实拍 / 原创 / 个人体验; ② AI 无人工创作, 违背公平

3. 结构设计

1. 开头 (1 句): 承接来信, 明确支持取消资格

2. 主体 (4 句): 理由 1 (摄影 = 实拍 + 原创 + 情感); 理由 2 (AI 破坏公平, 不尊重参赛者)

3. 结尾 (1 句): 总结观点, 呼应艺术本质

4. 语言要求必备词汇: originality、fair competition、genuine effort、creative process

核心论点: 支持

论点一: 摄影比赛的核心是人的创作力 (human creativity/artistic effort)

论点二: AI 作品缺乏真实瞬间的捕捉 (capture real moments)

论点三: 公平性 (fairness) unfair to other participants; 比赛的初衷与本质 (authenticity)

话题短语:

1. the core/meaning/essence of the contest

2. capture fleeting/flashing moment with a camera lens

3. violate/go against the rules of the contest

4. blur the line between... and...

5. lack emotional connection

6. go against the original intention of ...

7. lack the photographer's personal touch (笔法; 艺术技巧; 特色)

put the finishing touches to sth 最后的润色; 修饰

8. at the expense of fairness

9. the credibility of the contest 可信度

10. AI-generated images, however impressive it is, lacktouch

11. On a deeper level, this is not to say that AI art has no value; rather...

12. In this sense, the school's decision is both fair and far-sighted

句子翻译: 1. This decision serves as/ stands as an embodiment / testament of the school's commitment to authenticity/originality/creativity. 体现学校对真实性的坚守

2. What AI fails to do is to truly honor the hard work of photographers who spend time perfecting their craft.

3. It is human creativity and real-life capture that the contest aims to celebrate, not AI-generated images

Dear Mark,

Thanks for sharing the disqualified photo case with me. I fully support the school's decision to disqualify the AI-generated entries.

In my view, using AI goes against the original intention of the contest, which is meant to celebrate human creativity and the skill of capturing real moments. While AI images may look impressive, they lack the photographer's personal touch, patience, and emotional connection to the scene. Furthermore, allowing such entries would compromise/damage/harm the fairness of the competition and deprive other students of a fair chance. It would also set a negative precedent, discouraging those who have devoted genuine effort to their work. After all, the essence of photography lies in witnessing life, not generating it.

In this sense, the school's decision is both fair and far-sighted. What do you think?

高分级

Thanks for sharing the disqualified photo case with me. After giving it some thought, I fully support the judges' decision.

At its heart, photography is the art of capturing an authentic moment - a beautiful scene that inspires awe, a touching memory that stays with us, or a real event that makes people think deeper. An AI-generated image, no matter how stunning, simply cannot carry that essential truth. More troubling still is the unfairness it brings. While other competitors spent hours taking the perfect shot or waiting patiently for the first light of dawn, the submission of an AI creation skips that entire journey of hard work and skill. To reward such a shortcut would not only hurt the contest's fairness but also make the real efforts of every other participant seem completely meaningless.

It was undoubtedly the right decision. What's your perspective?

Thanks for sharing the disqualified photo case with me. Honestly, I believe the disqualification was both fair and necessary.

Beyond violating photography's fundamental definition, this decision holds significant educational value. Rules establish the boundaries of fair competition, and following them builds integrity - a quality that extends far beyond any contest. When schools stick to such standards, they teach us that success achieved through shortcuts lacks meaning, while honest effort builds true character regardless of the outcome. In today's world where technology often makes it hard to tell right from wrong, learning to respect established guidelines represents a

crucial lesson in personal responsibility. It also ensures that all participants are judged on an equal basis, protecting the hard work of those who follow the rules.

I think it was the right call. What's your take?

读后续写：1. 原文核心

人物：我、父母；核心矛盾：池塘提前结冰→金鱼缺氧→加热器因雪延迟

关键伏笔：海报提示：流动水不易结冰（续写唯一解决办法）

情感变化：焦急→冷静思考→全家行动→安心

主题：家庭协作、用智慧解决突发困难

2. 续写方向第一段开头：So we started brainstorming ideas together.

写作方向：全家回忆海报方法→拒绝砸冰（会伤鱼）→确定用流动水→找水泵、软管等工具

第二段开头：By nine o'clock, we had built a simple device to keep a hole open in the ice.

写作方向：装置运行成功→冰面留洞→金鱼恢复活力→全家欣慰→感悟智慧与合作

3. 语言要求 动作细节：recall、refuse、fix、assist、circulate

心理描写：anxious、relieved、grateful

So we started brainstorming ideas together. "In such cold weather, water would just refreeze," Dad said. Then I remembered the vital anti-freezing tip from the poster "Moving water doesn't freeze easily! What about the old pump in the garage/basement?" I shouted with excitement. Mum's eyes lit up and she nodded in agreement. Dad rushed out and soon came back carrying a dusty pump from an old fountain and quickly installed the pump skillfully, Mother prepared fresh water, and I positioned the device steadily. We cooperated fully to save the trapped goldfish.

By nine o'clock, we had built a simple device to keep a hole open in the ice. The pump operated smoothly, keeping the water flowing gently to maintain an open hole. The fish could breathe in fresh oxygen and soon swam actively again. I was overwhelmed with relief and joy. At noon, sunlight shone through the cloud and the golden rays were reflected on the white-covered road and the pond. At the sight of tiny bubbles floating up, I smiled, feeling warmer than any heater could ever make me. This unforgettable experience taught me that calm thinking and close family cooperation can perfectly solve unexpected emergencies and guard the small lives around us

Sample 2: So we started brainstorming ideas together. "We can break a hole on the surface to let the fish breathe in fresh air." Mum suggested. But how to avoid it being frozen again in such cold weather. Suddenly, I remembered the poster that lists clever ideas to prevent ice from sealing. "We must keep the water moving/in motion, so that it will not freeze." I shouted with excitement. At my suggestion, my parents nodded in agreement and quickly swung into action. Cracking a hole was easy, but it was difficult to keep water in motion. Dad quickly ran to the basement to fetch a drill/hammer to break a hole and an old fountain pump and some other materials. Exchanging a smile with determination and anticipation, we threw ourselves into making a device immediately.

By nine o'clock, we had built a simple device to keep a hole open in the ice. Dad gently lowered it into the frozen pond, and we held our breath in tense anticipation. Gradually, the solid ice cracked open, leaving a tiny clear hole on the surface. Beneath the ice, the pond water began to flow steadily and softly. I knelt by the pond, staring at the water until I caught sight of Spotty and Sparkly swimming toward the opening. "They're alive and safe!" I exclaimed with immense relief. A warm smile spread across Mum's face, and Dad let out a long sigh of relief. At this profound moment, it dawned on me that what truly counts is never merely the pond, but the sincere family bond and precious teamwork we embodied while striving to guard the lives we cherish deeply.

So we started brainstorming ideas together. Overwhelmed by anxiety, I paced restlessly back and forth, proposing that we break the thick ice with a shovel. However, Dad shook his head firmly, cautioning that such a rough method might injure the delicate goldfish swimming underneath. Mum knitted her brows deep in thought, while precious time slipped away silently yet swiftly. All of a sudden, the poster from the local garden shop flashed through my mind. "What if we keep the water circulating?" I blurted out in excitement. A spark of light instantly flickered in Dad's eyes. Without the slightest hesitation, he hurried to the garage to fetch an old fountain pump, while Mum and I followed to offer a hand. A surge of nervousness welled up inside me as we devoted ourselves to the work, making me urge my parents to speed up the process repeatedly. Step by step, a simple but functional device gradually took shape before our eyes.
